

Models VSI / IVSI / N

Modular, Prefabricated Factory-Built Venting Systems

LABORATORY FUME VENTING APPLICATIONS

TYPICAL FUME HOOD APPLICATION
AMPCO MODEL N SINGLE WALL

Save time and money with AMPCO commercial venting:

- Factory-built for high quality
- Fully welded linear seam
- Stainless steel construction with options available for less corrosive applications
- 5" to 52" diameter (ID) single wall and double wall models
- Low material and labor costs
- Simple and quick to install with ½" Vanstone flange and bolted v-band joint connections
- No on-site field welding
- Engineering support for design services
- Backed by industry-leading warranty

A LOT OF THINGS GO WRONG IN YOUR
AVERAGE WORKDAY.
THIS WON'T BE ONE OF THEM.

Laboratory fume hood applications shown with AMPCO factory-built double wall and single wall venting.

Example layout shown with AMPCO ventilation.

Application

Laboratory fume venting for commercial and industrial environments.

AMPCO A Better Solution

Modular, factory-built ventilation offers a better way to exhaust laboratory fumes.

Similar to boiler flue pressure stack, engine/generator exhaust and grease duct applications, AMPCO factory-built systems are engineered with flanged joints, designed for both quick assembly and pressure sealing capabilities. Options include insulated piping components as well as an array of structural accessories needed for support and attachment to building structures.

Each AMPCO component is shipped complete and ready for installation, which includes vee bands, outer channel band enclosures for double wall models and all the necessary hardware.

AMPCO manufactures high quality, factory-built multi-use ventilation systems.

Time-tested commercial and industrial installations throughout North America and globally.

ENGINEERING TOMORROW'S SOLUTIONS TODAY.
